

iTime

Time and Attendance made easy

Managing your employees' time and attendance is simple with the iTime terminal and web browser based software. Ideal for small to medium businesses, iTime can track, record and report on time and attendance information for up to 50 employees. With no software to install, it's easy to set up and start monitoring your staff in minutes. What's more, iTime is a **Pay as you Go** solution, enabling you to **add employees** to the system for just **£2 each per month** and ensure that you only pay for what you use, when you use it.

- **Manage absences, holidays and lateness**
- **Automatic calculation of hours worked**
- **Speed up processes and increase business productivity**
- **Generate real time data calculations and reporting**
- **Reduce unnecessary administration**
- **Reduce payroll costs**
- **Monitor and control labour resources**

iTime

Time & Attendance System

The iTime application uses the latest 'plug and play' internet cloud technology, making it easy to use and always completely up to date and secure with automatic data backups. All you need is a PC with internet access and an Ethernet connection point.

Everything you need to set up iTime is included in the box; simply connect up the iTime terminal, login to iTime on the internet, add your employees and start tracking. With the ability to manage multiple shift patterns, holiday planning, absences and even remote workers, iTime provides real time data and reporting for businesses of all shapes and sizes.
